

# Christian Crawford

Senior Software Engineer | Frontend Architecture & Complex Product Systems

Cincinnati, OH · [christian.crawford@pm.me](mailto:christian.crawford@pm.me) · [linkedin.com/in/christiancrawford](https://www.linkedin.com/in/christiancrawford) · [christiancrawford.dev](https://christiancrawford.dev)

## SUMMARY

---

Senior frontend engineer who came up through design. Takes product problems from “what should this be?” to a shipped, tested interface on an architecture other engineers can live with. 20+ years across design, development, consulting, and architecture; now leading frontend architecture for a multi-brand healthcare platform.

## SKILLS

---

**Frontend:** TypeScript, JavaScript, React, Next.js (App Router, Server Components), Angular, HTML, CSS, Tailwind CSS

**Data & state:** GraphQL, Apollo, Zustand, MUI

**Quality:** Playwright, axe-core, Lighthouse CI, WCAG 2.2, keyboard and screen-reader testing, SEO regression testing

**Architecture:** Multi-brand, configuration-driven platforms, design systems and tokens, product shaping, modernization

**Platforms & AI:** AWS, Contentful, Mapbox, JAMstack, Claude Code, agent governance and guardrails

## EXPERIENCE

---

**HealthWarehouse.com, Inc.** · Cincinnati, OH

January 2022 – Present

### Senior Software Engineer

- **Multi-brand architecture.** Built the system that runs a team-built Next.js/React pharmacy platform’s three brands (HealthWarehouse, SpringMeds, PharmcoRx) from one shared codebase instead of separate apps.
- **Team standard.** Set the rule the team now builds by: each brand difference lives in the smallest unit that can hold it, with config for data and a per-brand component only where a brand truly differs.
- **Third brand.** Added PharmcoRx with a config file and build scripts and no structural change, then ran its redesign in seven measured phases; the other two brands came out unchanged against baseline.
- **Partner portal.** Wrote the pitch for a self-service partner portal and am building most of its frontend, designed for operations staff: labeled filters, linkable record panels, and a keyboard-navigable WAI-ARIA grid.
- **Accessibility.** Fixed most of the issues audits found, on the way to a third-party WCAG 2.2 seal; form errors and confirmations now reach screen readers across checkout and account forms.
- **Automated testing.** Wrote Playwright and axe-core suites covering 42 routes in five browser/device profiles (210 of 210 scans clean), interaction and keyboard flows, and 83 routes of SEO checks.
- **Core product.** Migrated the app from the Pages Router to the App Router and did most of the frontend work on checkout and payments.
- **AI-assisted development.** Designed governance for AI-assisted development: repository contracts, decision logs, lifecycle hooks, and approval checkpoints that hold rule changes for human review.

**Ingage Partners, LLC** · Cincinnati, OH

July 2017 – December 2021

**Senior Consultant** ← *Developer (Mar 2018 – Apr 2021)* ← *Frontend Developer (Jul – Sep 2017)*

- Delivered 10+ client engagements, from startups to enterprise modernization, building React, Angular, and JAMstack applications with Mapbox, AWS, and Contentful integrations.
- Grew from frontend implementation into architecture, reusable component patterns, and senior consulting.
- Worked directly with clients, product, and design teams to turn ambiguous requirements into working software.

**Kroger** · Cincinnati, OH

June 2014 – June 2016

### UI Developer

- Helped modernize the frontend of ClickList and internal applications, moving systems from WebSphere to AngularJS.
- Built responsive interfaces and contributed to internal React applications within Agile teams.

**CBTS, Cincinnati Bell** · Cincinnati, OH

May 2013 – June 2014

***Senior Application Developer***

- Built full-stack web applications in C#, Razor, and JavaScript, from architecture and implementation through testing, performance diagnosis, and production support.

**Trivantis** · Cincinnati, OH

March 2008 – May 2013

***Creative Manager***

September 2011 – May 2013

***Multimedia Designer***

March 2008 – August 2011

- Led web, video, and digital product work; built Drupal and WordPress systems, set design standards, and mentored designers moving into technical roles.
- Created interactive web and eLearning experiences with Flash, ActionScript, and 3D tools.

**Ginghamsburg Church** · Tipp City, OH

October 2005 – March 2008

***Web Designer***

- Created the organization's first cohesive digital presence in TYPO3, bringing its website, multimedia, and print and digital standards together.

**EDUCATION**

---

**Full Sail University** · A.S., Digital Communication and Media/Multimedia

2003 – 2004
